

Requirements for Tree Preservation Ordinance Using a Tree Stand Delineation:

Blue Polygons: Canopy to be removed	Solid Blue Arrows: Proposed Grade
Red Polygons: Canopy to be saved	Hollow Blue Arrows: Existing Grade
Orange Polygons	

Summary of Significant Tree Preservation:

Total Canopy: 142,287 ft²
 Canopy to be removed: 89,624 ft²
 Canopy to be saved: 52,663 ft²
 Percent Canopy to be saved: 37%

Summary of Heritage Tree Preservation:

1. 12" Persimmon (Preserved)
2. 8" Persimmon (Preserved)
3. 26" Live Oak (Preserved)
4. 32.5" Live Oak (Removed)
5. 9" Persimmon (Preserved)
6. 25" Live Oak (Removed)
7. 34" Live Oak (Removed)
8. 33.5" Live Oak (Removed)
9. 26" Live Oak (Removed)

A Tree Stand Delineation may be used in lieu of the Tree Survey for the Tree Preservation Plan if there is a continuous area of canopy measuring 20,000 ft². The tree area(s) required to be preserved is twenty-five percent (25%) with the existing understory. A Tree Stand Delineation consists of a current aerial photograph (minimum resolution of 6-inch pixels) with an overlay of the development, an outline of the tree area(s) and the tree area(s) and understory to be preserved and information as stated in 35-B125 such as existing and proposed grades, easements, etc.
